

## British Summertime Invention Competition

My name is:

My age is:

I live here:

The name of my invention is:

The Science Museum is challenging you to put your thinking cap on and invent something for the British summertime. Your invention should try to solve a problem we face during the summertime in Britain. Could a picnic hamper with a pop up umbrella to shield you from an unexpected rain shower help? Or a sunshade to stop your ice-cream melting in the sun?

To get started, think about the places you visit when you're holidaying in Britain and the problems you may face:

- at the seaside
- in the countryside
- on a long car journey
- in a caravan
- at home in the garden
- camping in a tent

1. What is your invention?

2. What British summertime problem will your invention solve?

3. How will your invention work?

4. What will your invention look like?

5. Why should your invention win the competition?

To enter the competition you can either email your form to [marketing@sciencemuseum.ac.uk](mailto:marketing@sciencemuseum.ac.uk) or post it to

Summer Invention Competition  
Marketing Office  
Science Museum  
Exhibition Road  
South Kensington  
London SW7 2DD

## The prize

The winner will receive a MakerBot Replicator 2 Desktop 3D Printer worth over £2,000 and will have their invention 3D printed and displayed in a new exhibition, *3D: printing the future* which opens on 9 October.
