Electricity scribbles

This activity explores the uses of electricity in everyday life and reinforces the vocabulary associated with electricity usage.

You will need

- Pens
- Pencils
- Paper

Steps

1

Ask your pupils to pair off. Give them one minute to write a list of all the things they can think of that use electricity.

2

Taking turns, ask each pairing to communicate their list to the rest of the class by drawing each of the things they have thought of within a time limit (as in the game 'Pictionary').

Analysis/ discussion

Imagine you are alive in 1700. How many modern words can you think of that are associated with electricity and would be unfamiliar to most people at this time.
