

Science Museum online resources

The web is one of the most important inventions of the last century and we are making the most of it as yet another way for people to enjoy science!

www.sciencemuseum.org.uk

The Science Museum's own website is the place to find out what's on with details of exhibitions, events, IMAX films and more. Booking facilities exist for some paid-for attractions. There is information for educators and you can sign up for our e-newsletter.

<http://objectwiki.sciencemuseum.org.uk>

An ongoing project, the object wiki collates information about many items from the Science Museum's collection. As it is a wiki anyone can add his or her own comments and memories.

www.sciencemuseum.org.uk/launchball

Inspired by our interactive gallery *Launchpad*, the award-winning *Launchball* is an ever-popular online game where you slide, bounce and spring your way through 30 obstacle-filled levels. Create your own levels too using your physics know-how. Its 1.8 million players can't be wrong!

www.makingthemodernworld.org.uk

Making the Modern World brings powerful stories about science and invention, from the 18th century to today, straight to your computer. The site uses dynamic multimedia techniques to expand upon the permanent gallery at the Science Museum and provides learning modules relevant to a variety of A-level subjects.

www.ingenious.org.uk

Ingenious brings together images and viewpoints to create insights into science and culture. It weaves together people, innovations and ideas. The site contains over 30,000 images which are used to illustrate over 30 different subjects, topics and issues.

www.sciencemuseum.org.uk/broughttolife

Brought to Life: Exploring the History of Medicine is a multimedia initiative for GCSE history students studying the 'Medicine Through Time' module and undergraduates studying history of medicine. The website, supported by the Wellcome Trust, presents 4000 objects from the medical collections, some on view for the very first time.

www.talkscience.org.uk

The *Talk Science* website supports a masterclass for secondary school teachers of the same name. Using this new site, teachers can find all the resources they need to support classroom discussions about contemporary science topics and upload their own.
