

Extendable Bonko

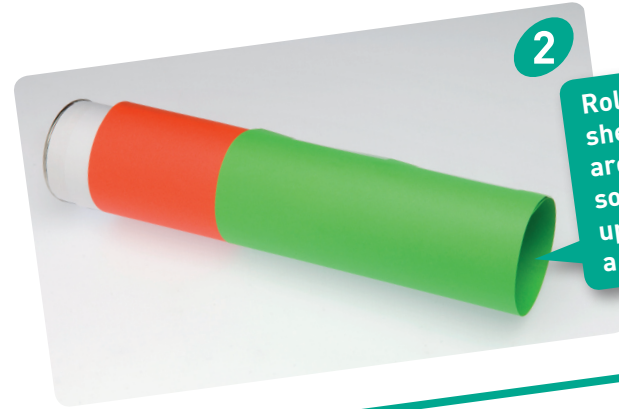

A good excuse for scoffing a whole tube of crisps – all in the name of science.

www.sciencemuseum.org.uk/launchpadeducators

Grab this stuff...

Roll one sheet of card lengthways around the crisp tin and tape it in place.

Roll the other sheet of card around the first, so that it slides up and down like a telescope.

Make the tubes as long as possible, then hit the tin against the floor.

Make the tubes shorter and bang the tin again.

Know any good tunes?
