

Bar-Code Trail

Create and crack a code using your mobile phone

Educators' notes at www.sciencemuseum.org.uk/scienceboxes

1. Pick an object that follows a theme, e.g. polymers.

2. Label it with a mobile code that you create on a website such as <http://mobilecodes.nokia.com/index.htm>.

3. Read the code as a text message by scanning it with a mobile phone.
